AN AURA OF
PROFESSIONALISM
WITH APT PRECISION

WHY US?

we use zamak #5 for all our products, which has higher copper content than zamak 3, which results in higher strength with durability.

we use virgin zinc for our products as we have in-house alloy production facility.

our entire product range has 2/3 layers of copper which enhances post plating life.

we do lacquering upto 160°C that gives our products a long lasting finish.

we can design and develop customised products as per customers requirement, design choice and budget.

all our product designs are registered.

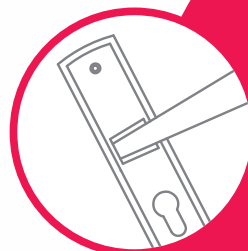

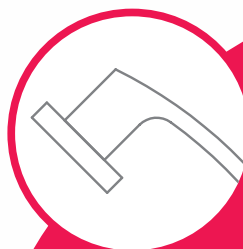

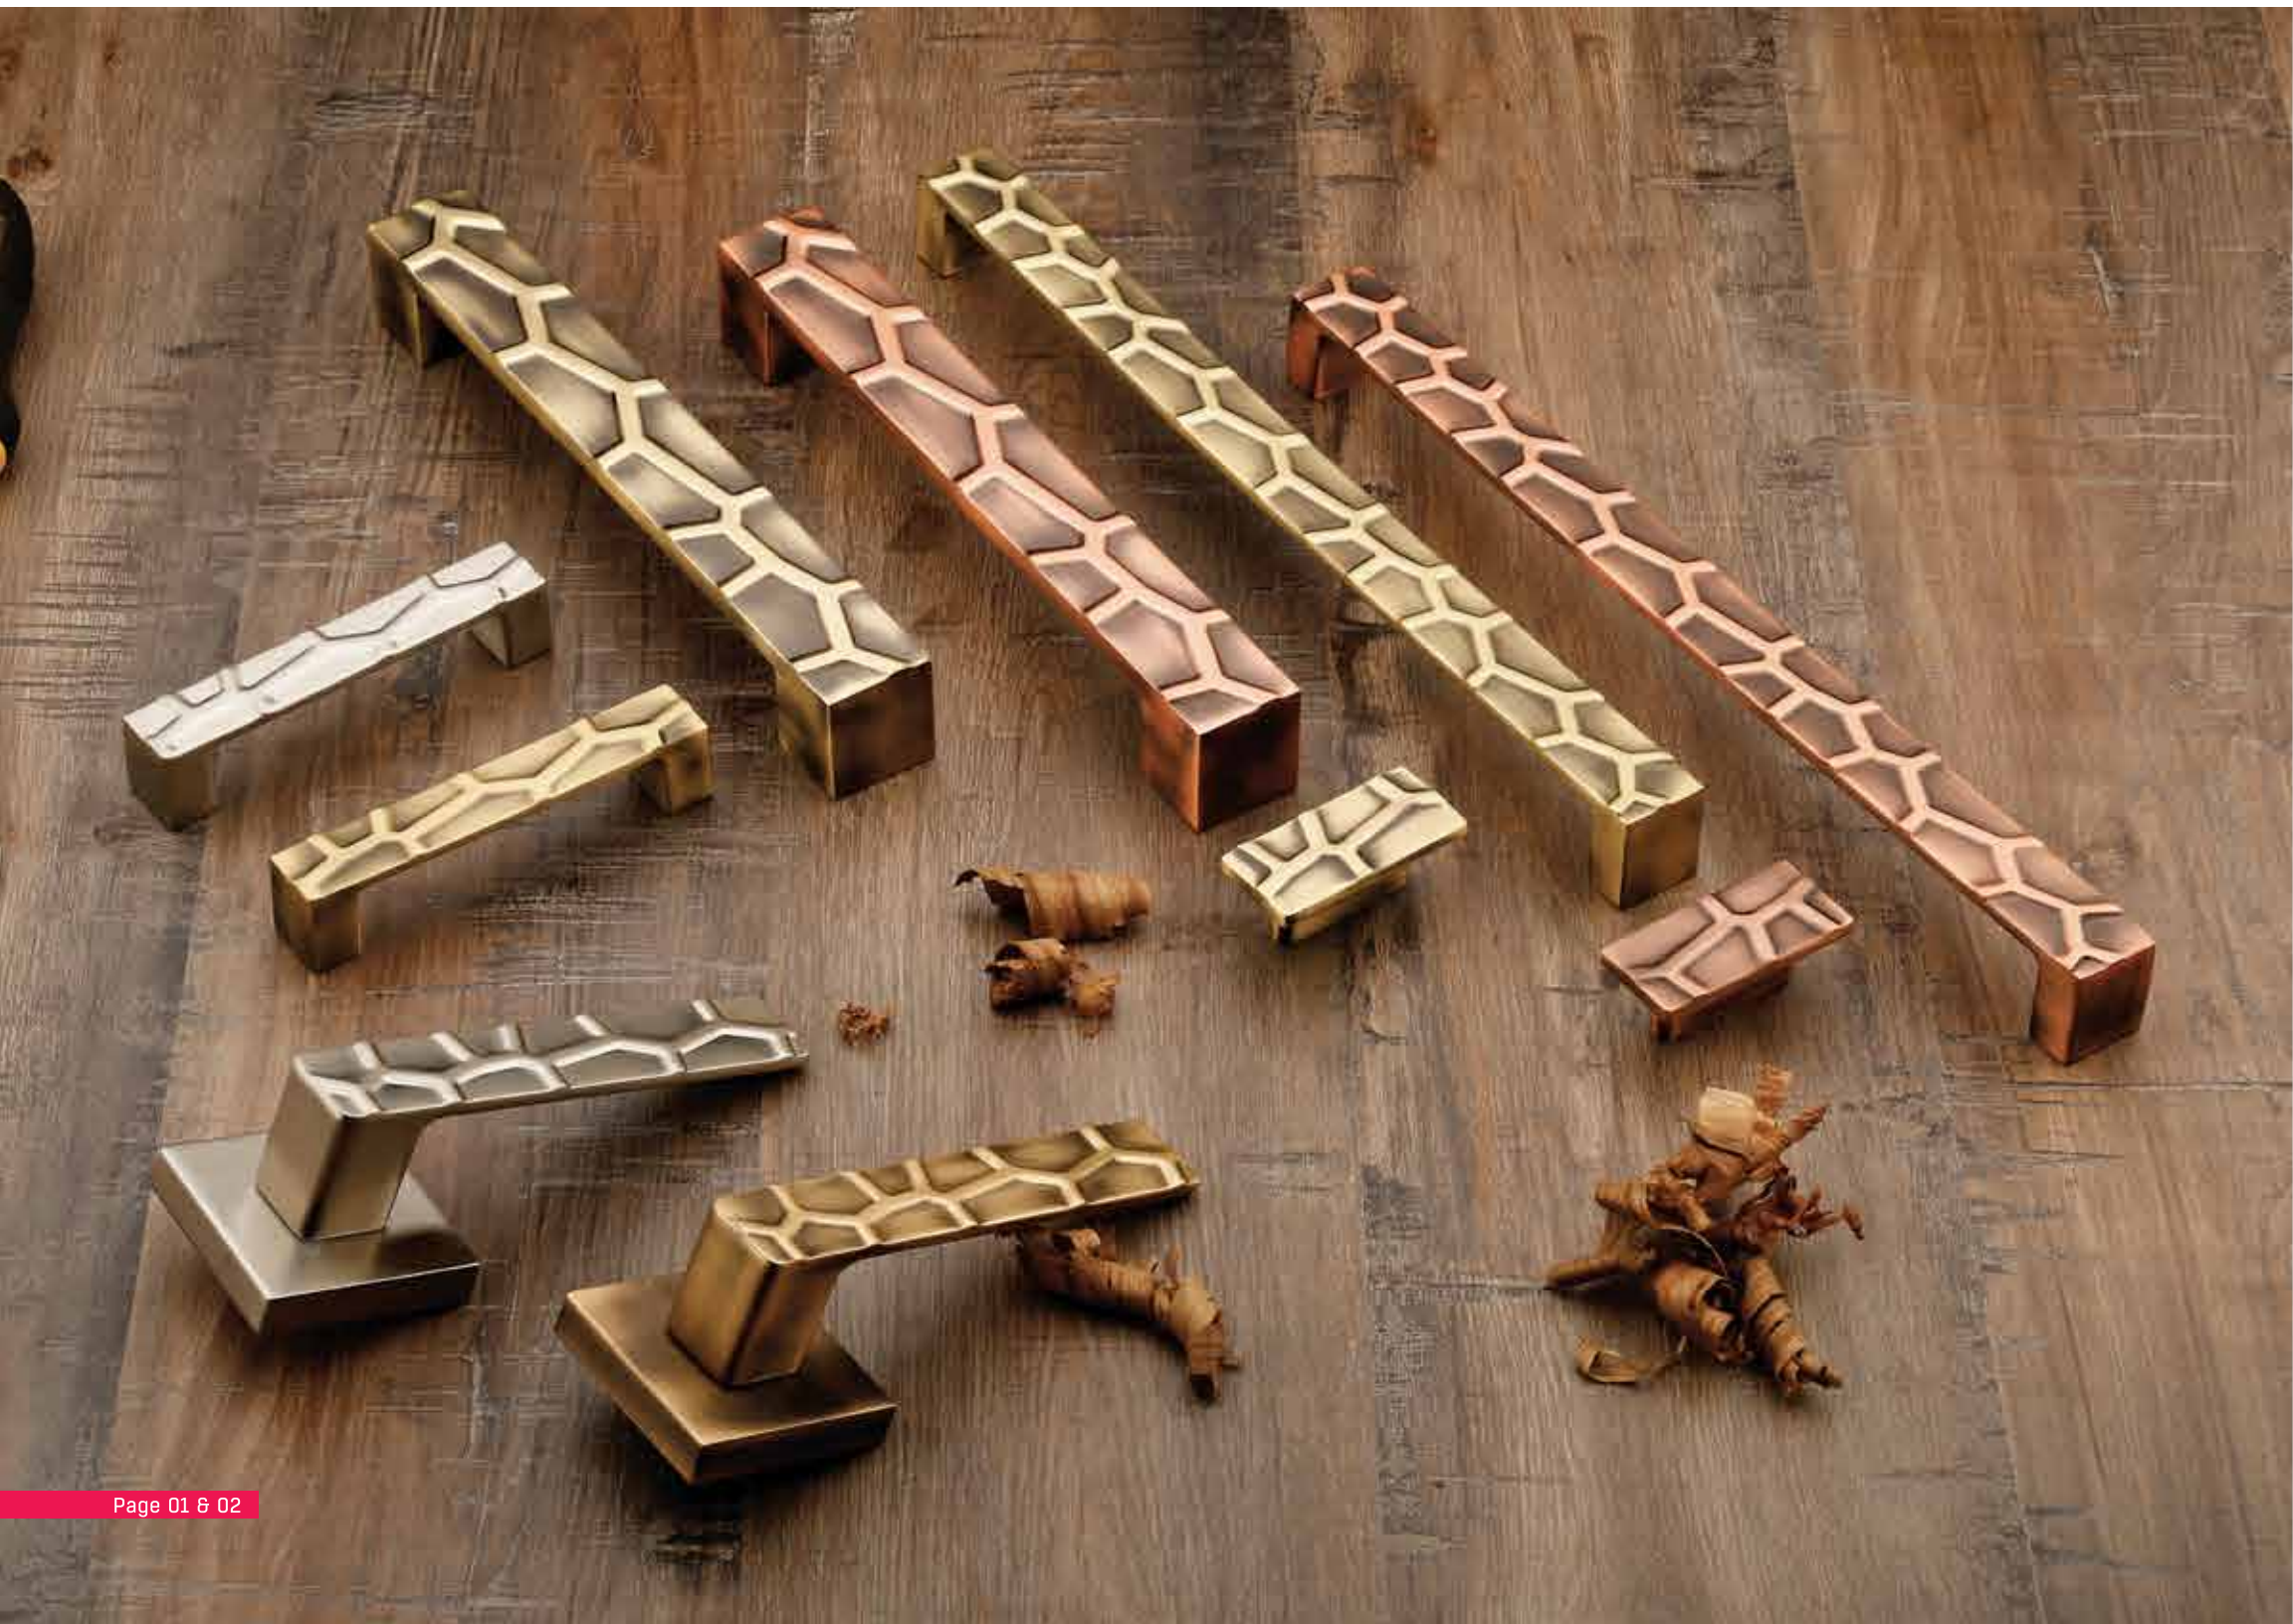

SHUBHRA™

GIVE YOUR DECOR THE ENTHRALLING APPEAL

Achieving excellence is not easy. But once you master the art, it becomes a characteristics of your being.

Our commitment towards complete customer satisfaction through high quality products and service and customer support drives our growth in this modern competitive market. To further fuel the progress, we continuously focus ourselves on developing new designs and products to serve the ever growing demand of modern architectural hardware fittings.
